REMEMBER ALWAYS: INOCULATE YOUR LEGUME SEEDS EVEN THOUGH PLANTED ON FIELDS THAT HAVE BEEN INOCULATED BEFORE. Field tests have shown that better crops are harvested when Legume seeds are inoculated even when planted on fields where inoculated seeds of the same Legume crops had grown the previous year. It seldom pays to depend upon natural inoculation.

YOU BUY INOCULATION ON FAITH:—You cannot see the nitrogen-fixing bacteria. They are visible only under a high-power microscope and not to the naked eye. Immediate demonstration therefore is impossible; consequently you must purchase legume bacteria on faith and faith only.

- NITRAGIN — is the oldest and most widely used inoculator in America.
- NITRAGIN — has served the American farmers since 1898.
- NITRAGIN — was awarded a GOLD MEDAL at World's Fair, St. Louis, 1904.

If your dealer does not have NITRAGIN in stock have him get it for you. **INSIST ON NITRAGIN INOCULATION.** ACCEPT NO SUBSTITUTE.
